

Pettorway

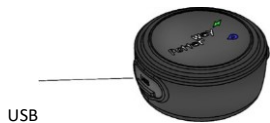

Charging

To charge your tracker simply plug into the rapid charger using the USB cable provided.

*First charge required : 3 hours

*Charging thereafter: 2 hours

When the tracker is plugged in and charging the red LED will be lit, once charging is complete the green LED will be lit. If the tracker is not on charge and requires a charge red LED will flash.

Create an account

Visit www.pettorway.com and click Member login and then create an account.

Once logged in click on the Profile Tab and click the Add a Pet. Then fill in your pet details and enter the 15 digit Device ID which is located on a silver sticker on the internal packaging. (Please make sure the tracker is turned on)

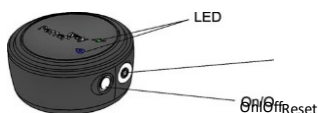

Power On/Off

Once tracker is charged take the unit outside in view of the sky away from building and trees.

Press and hold down the on/off button for 5 seconds until the two LED lights light up which indicate that the tracker is on.

Once the blue LED light starts flashing the tracker is ready to start recording your pets journey.

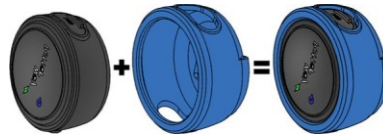

To turn the tracker off simply hold down the on/off button for 5 secs and the light will flash fast then turn off.

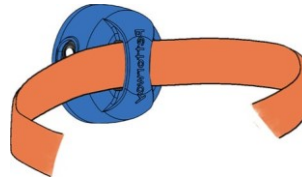

Z1 Users Guide

Attach to Collar

Simply insert the tracker into one of the protective cases provided.

Then thread the collar through protective case as seen below, please note a Velcro strap is supplied for over sized collars.

What the Light's mean?

1. GPS Light

Blue flashing : GPS signal locked onto satellite, ready to go.

Blue : Permanently on : Tracker searching for GPS satellites.

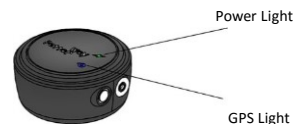

Blue light off : Tracker gone into Standby mode.

2. Power Light

Green constant on : Charged and ready to go.

Red constant on : Charging.

Red flashing : Low power please recharge.

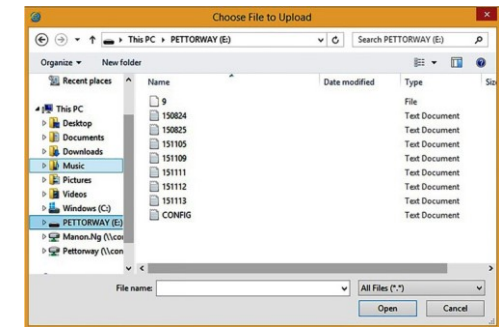

Upload your pets Adventure

When you pet has returned simply connect your tracker to your PC using the USB cable provided. **Please make sure the tracker is switched on before connecting to your laptop.**

When logged into your account click the Adventure tab then Click Upload data button

Click browser and select the Pettorway Drive

You will see a number of files which are in reverse data order, select the date which you would like to upload. E.g. 18th November 2015 displays as 181115.

You can then view your pets adventures. By clicking on the calendar you can view your pets previous adventures.
